

David Jituboh
Lagos, Nigeria
davidjituboh578@gmail.com

Summary

Highly motivated and detail-oriented full-stack developer with a strong foundation in front-end development, skilled in JavaScript, React, and HTML/CSS. Proficient in a range of technologies, including React, Redux, TypeScript, and SQL. Strong analytical and problem-solving skills, with excellent organization and time management abilities. Proven ability to work independently and collaboratively as part of a team.

Experience

- **Full-Stack Developer**, Taste of Naija, Manga Reader, Stryda Remote (2024 – Present)
 - Developed a full-stack manga reading platform using React, Redux, and TypeScript, with a focus on performance optimization and analytics.
 - Designed backend architecture for Stryda, including friend logic, communities, and Supabase login authentication; collaborated with a coursemate on frontend.
 - Created Taste of Naija e-commerce platform for Nigerian dishes targeting UK customers.
 - Optimized Redux and API calls, improving performance and reliability.
- **Independent Software Engineer**, Self-Study Projects Remote (2023 – Present)
 - Completed JS Mastery Pro projects and multiple React builds.
 - Studying software engineering process, system design, and DevOps basics.
 - Structured 3–4 year plan to become a professional engineer.

Education

- Nile University of Nigeria Abuja, Nigeria
- B.Sc. Software Engineering, 200 Level, GPA: 4.91 Expected 2028

Projects

- **Manga Reader Web App**
 - Built full manga reading platform with persistent global state and optimized cover loading.
 - Technologies: React, Redux, TypeScript, Appwrite.
- **Taste of Naija**
 - Built e-commerce platform for Nigerian dishes targeting UK customers with responsive UI.
 - Technologies: Next.js, TailwindCSS, Stripe.
- **Stryda**
 - Developing Stryda project backend, including friend logic, communities, and login authentication using Supabase.
 - Technologies: React, React Native, JavaScript, Supabase.

Skills

- Programming languages: JavaScript, TypeScript, C, SQL
- Front-end development: React, Redux, HTML/CSS
- Back-end development: Node.js, Supabase
- Databases: SQL
- Tools: Git, VS Code, Docker, Figma
- Mathematics skills: algebra, geometry, calculus
- Analytical abilities: data analysis, problem-solving
- Teamwork experience: collaborative projects, communication
