

DAVID JITUBOH

Lagos, Nigeria

davidjituboh578@gmail.com | |

SUMMARY

Highly motivated and detail-oriented full-stack developer with a strong foundation in front-end development, proficient in JavaScript, React, and HTML/CSS, and experienced in working on various projects, including Manga Reader Web App and Taste of Naija e-commerce platform.

EDUCATION

Nile University of Nigeria Abuja

B.Sc. Software Engineering

Abuja, Nigeria

Expected 2028

EXPERIENCE

Full-Stack Developer

2024 – Present

Taste of Naija, Manga Reader, Stryda

Remote

- Improved performance and reliability of Manga Reader platform by optimizing Redux and API calls
- Designed and implemented backend architecture for Stryda, resulting in enhanced user experience and improved authentication
- Developed and deployed Taste of Naija e-commerce platform, resulting in increased customer engagement and sales

Independent Software Engineer

2023 – Present

Self-Study Projects

Remote

- Completed multiple React builds and JS Mastery Pro projects, demonstrating proficiency in JavaScript and React
- Studied software engineering process, system design, and DevOps basics, enhancing knowledge and skills

PROJECTS

Manga Reader Web App | ['React', 'Redux', 'TypeScript', 'Appwrite']

- Built full manga reading platform with persistent global state and optimized cover loading
- Improved performance and reliability by optimizing Redux and API calls

Taste of Naija | ['Next.js', 'TailwindCSS', 'Stripe']

- Built e-commerce platform for Nigerian dishes targeting UK customers with responsive UI
- Resulted in increased customer engagement and sales

Stryda | ['React', 'React Native', 'JavaScript', 'Supabase']

- Developing Stryda project backend including friend logic, communities, and login authentication
- Collaborated with a coursemate on frontend development

TECHNICAL SKILLS

Languages: ['JavaScript', 'TypeScript', 'HTML/CSS', 'C']

Frameworks: ['React', 'Redux', 'Next.js']

Tools: ['Git', 'VS Code', 'Docker', 'Figma', 'Appwrite', 'Supabase', 'Stripe']
